MOTORCYCLE TRACKING DEVICE

Motorcycle tracking device with IP68 standard, battery-friendly with 2000mAh Li Ion polymer internal battery, can be mounted on different parts of the motorcycle

HARDWARE TECHNICAL SPECIFICATIONS

- › 2000 mAh Li-ion polymer internal battery
- › IP68 protection
- › GNSS
- › Assist GNSS - accurate location information
- › BLE 5.0
- › 6-axis accelerometer
- › 1 digital input
- › 1 digital output
- › 1 ignition connection
- › 1000 circle and polynomial geofences
- › FOTA and SMS support

HARDWARE FUNCTIONS

- › Real time location tracking
- › Speed violation notifications
- › Geofence and route notifications
- › Park and valet modes
- › Overturning notification
- › Remote engine stopping function
- › BLE sensors supported
